Preface

This is a template for writing a master thesis at INN.

For a tutorial on how to add and edit a title page see here...

1 Introduction

Example reference (Klein et al. 2018)

2 Creating and editing a title page

A title page can be added to a quarto book by using an extension with pre-specified formats. The `quarto_titlepages` is such an extension.

The full documentation can be found here, below follows a adopted tutorial to create a INN-styled title page.

2.1 Install the extension

Using the terminal, install the extension to your existing quarto book project by typing:

```
quarto install extension nmfs-opensci/quarto_titlepages
```

and follow the instructions. This will install the extension making it possibly to use pre-specified title-page themes.

2.2 Updating the `_quarto.yml` file

The pre-specified themes comes with a set of yaml-values that will populate you title page. In the code below the yaml-field of the current book is reproduced. You can copy the code from the `format` line and add to your book.

```
project:
  type: book
book:
  title: "Main title of the master thesis"
  subtitle: "Subtitle of the master thesis"
  author: "Daniel Hammarström"
  date: "2024-05-15"
  chapters:
    - index.qmd
```

```
      - intro.qmd
      - titlepagetutorial.qmd
      - summary.qmd
      - references.qmd
